RE: Flotation Plant
Taylor Placer Property
ACT/019/016
Grand County, Utah

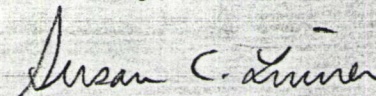

Dear Mr. Ruf:

The Division is in receipt of your letter of notification that a flotation process will be used to recover ore at the Nancy Minesite on the Taylor Placer property.

This new material will be incorporated into the Division's review of the Mining and Reclamation Plan (MRP) for the property as a whole. As such, no separate approval for the use of the named regents or use of tailing ponds for this purpose (or any purpose related to mining) can be given at this time. An analysis will be done to determine whether or not the ponds are properly sized to contain all the process water, as well as runoff events from the natural drainage area, before an approval for the system as proposed can be granted.

The Division is continuing the review of the MRP and will notify you of further information needs as soon as possible. Please contact me if I can be of further assistance.

Sincerely,

Susan C. Linner
Reclamation Biologist/
Permit Supervisor
